Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 62-80 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0308770 or DeSimone et al.

See the appropriate paragraph of the 3/16/07 final Office action.

The 8/21/07 amendments have replaced "a region" with the new claim language "an aperture." The specification on page 9 lines 2-6 describes the aperture(54) as circular and could also be in many different shapes and sizes to approximated the area of interest on the test strip.

EP teaches in column 8 lines 10+ an " ...aperature is formed in the bottom(44) of slide housing(34) between flanges(48) and (50) to define an opening(52) the reagent pad(22) ... allowing a measurement of the color developed in reagent pad(22)...". This is properly read on the claimed aperture. DeSimone et al. is the priority document for EP and teaches the identical features in column 6+.

Response to Arguments

Applicant's arguments filed 8/16/07 have been fully considered but they are not persuasive.

Applicants state the cited prior art fails to teach an aperture. The Office maintains both EP 0308770 and DeSimone et al. teach an aperture that is indistinguishable from the instant claims as described above.
